Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Georgianna in view of Brockway and Kemper. Georgianna shows the claimed step with the exception of the single attachment portion and the wedge. Brockway in fig.14 shows a single attachment portion 33 to enable attachment to a single aperture of a hollow pole. Kemper shows a wedge 36 for wedging an attachment portion through a hole in a wall. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Georgianna to comprise a single attachment portion, as taught by Brockway, to enable attachment to a hollow pole having a single aperture at different heights and to further comprise a wedge, as taught by Kemper to enable a wedging attachment of his step.

Claims 26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Georgianna, Brockway and Kemper as applied to claim 13 above, and further in view of Davidson. Davidson teaches the use of a removable step for climbing an apertured utility pole. It would have been obvious to one of ordinary skill in the art

at the time the invention was made to use the modified step of Georgianna in combination with an apertured utility pole, as taught by Davidson, to facilitate the climbing of a utility pole by a worker.

Claims 24 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
